## Gaming guns—safe & fun.

Our equipment uses **harmless infrared**—just like your TV remote; but bigger! When you pull the trigger you get great light and sound effects. Every gaming gun comes with integrated sensors so you can play either indoors or outdoors. Plus every one has a cool red dot scope for sighting. The gaming guns have ammo limits so when you run out, just press the left button once to reload. It takes around 6 seconds. Then you are back in action! Our professional referees will usually get the gaming guns to 5 "lives." The first 4 times players are tagged the gun makes a "ough!" sound, then on the final hit the gun goes "aaargh!" and turns itself off. Players return to their starting spot and one of the carers turns them on again with the key.
